In addition, we can enjoy an interesting movie or watch a funny show. This helps refresh my mind and study better. Another great advantage of **watching game shows** is that **it keeps the family close together**. In details, in the evening, we can watch films on the TV with our family in the living room and we can share happiness and sadness together.

However, we cannot deny the typical advantages of **watching news**. One of the most important advantages is that **it helps us update new information in our country and even around the world**. In detail, it enables we update a lot of information through watch news such as weather programs and education. Another advantage is that **it helps parents educate their children effectively**. In fact, when we watch news through the TV, our family members can discuss about many problems in society together.

All in all, **watching game shows** is the perfect choice for many people while **watching news** also brings us considerable advantages. As far as I am concerned, however, I am still convinced by the idea of **watching game shows** more than **watching news**.

5. READ THE FOLLOWING TEXT ABOUT AN EDUCATIONAL ISSUE

In the modern life, one of the most important concerns in the general public is **choosing a place to study**. Many people prefer to **study in a vocational school** while others claim that **studying at university** is the better choice. From my own perspective, I would rather **study in a vocational school** than **study at university** because of these typical following reasons.

It is clear that the advantages of **studying in a vocational school** are innumerable, one of the most important advantages is that **we can gain a lot of practical experience**. 4. **University OR vocational school** (trường dạy nghề)

In the modern life, some people prefer to go to college and university to get a degree while others like go to a vocational school and get a job training. From my own perspective, I would rather get university degree than get a job training due to some following reasons.

There are several main reasons for my choice of going to college and university to get a degree. The most important reasons is that it helps people get a university degree. That is because if we have a degree, we can choose a suitable job It is very necessary. Another reason that can be seen from everyone is that we have 4 years in order to learn in university. So it helps us widen knowledge. It is very good for us in the future. These are major causes for my choice

However it can not be denied that there are some advantages of going to a vocational school and getting a job training. First off all, we can save a lot of time. That is because we just take about 1 year to have a training degree. Secondly, we can save a lot of money. That is not my choice because we do not get a lot of knowledge So it is hard to have a good job, specially in the city.

To sum up, going to college and university to get a degree is good, while going to a vocational school and get a job training is fast. From my point of view, the most important things is whether they feel comfortable or not as well as it depends on the of lifestyle people have

They will guide us carefully to help us work out effectively. It is very necessary. Another reason that can be seen from everyone is that there are a lot of modern equipment and machine in the gym. However it can not be denied that there are some advantages of doing exercise outdoors. First off all, we can enjoy the nature as much as we can. We can breathe the fresh air. However, That is not my choice because we do not have the motivation from the instructors so sometimes we are lazy. Besides, it takes more time to be effective because we do not have special methods.

To sum up, working out in the gym is effective, while doing exercise outdoors is comfortable. From my point of view, the most important things is whether they feel comfortable or not as well as it depends on the of lifestyle people have

In the modern life, it is thought by many people that **to reduce air pollution, individual efforts will be not any results, it's only the responsibilities of the government**. I completely disagree with that idea because of the typical following reasons.

It is clear that there are many reasons why I strongly **disagree** this matter. One of the most important reasons is that **people can use the public transport or electric vehicles instead of private cars**. In fact, it helps to reduce emissions, the atmosphere also becomes cleaner. Besides, another typical reason is that **individuals should have good awareness to protect the environment**. In addition, each individual should participate in community activities such as planting trees, collecting garbage, using clean energy or recycling waste, so on to protect the environment.

However, there are various reasons that we cannot deny the importance of the government. One of the most important reasons is that **government should pass strict laws to prevent environmental pollution**. In addition, the government should fine money, do community service or arrest the individuals who pollute the environment. Another reason is that **government can organize many activities to protect environment such as garbage collection, using paper bags, using rationally and saving natural resources**. It means that these activities will encourage everyone to join hands to protect the environment and restore degraded natural ecosystems.

In the modern life, it is thought by many people that **to reduce overweight, the best way to deal with obesity of students is to introduce more physical education lessons in school curriculum**. I completely disagree with that idea because of the typical following reasons.

It is clear that there are many reasons why I strongly disagree this matter. One of the most important reasons is that we go on diet. In fact, it is a fact that when we diet, it helps us to have a healthier body, our skin is also more beautiful and we will feel more confident about our body. Besides, another typical reason is that we

should usually take part in outdoor activities and play sports regularly. In addition, we can feel relaxed when participating in outdoor activities and playing sports with friends, moreover, these activities will also help us lose weight effectively.

However, there are various reasons that we cannot deny the importance of school curriculum. One of the most important reasons is that schools should have more sports lessons for children in the school. In addition, it helps students understand and recognize the importance of lose weight to health. Another reason is that schools should organize many outdoor activities such as camping, climbing, jogging, swimming and so on. It means that participating in regular physical exercise activities is really necessary for us because it helps us to become healthier, besides, people become closer to each other and we can make new friends.

All in all, from what has been discussed above, I absolutely disagree with this idea. As far as, I am concerned, therefore, it is sensible that such controversial issues must be viewed from various aspects.

3. SOME PEOPLE THINK WE SHOULD BAN BRINGING A MOBILE PHONE TO SCHOOL BECAUSE OF ITS NEGATIVE EFFECT TO LEARNING ENVIRONMENT AND STUDENT'S PERFORMANCE. OTHERS THINK IT IS A USEFUL TOOL AND STUDENTS CAN CONTACT PARENTS. IN YOUR OPINION, A MOBILE PHONE SHOULD BE BANNED AT PRIMARY SCHOOL OR NOT -> AGREE

In the modern life, it is thought by many people that **a mobile phone should be banned at school because of its negative effect to learning environment and student's performance**. I completely agree with that idea because of the typical following reasons.

It is clear that there are many reasons why I strongly agree this matter. One of the most important reasons is that students will not focus on their study because they can listen to music, play games or chat with their friend in learning time. In fact, when students abuse their phones excessively, it leads to these students will not understand the lesson, lack of knowledge and it affects student's performance. Besides, another typical reason is that mobile phones are also the means for students to cheat in the exam. In addition, it makes them lazier in both studying and participating in sports activities, so their health is reduced.

However, there are various reasons that we cannot deny the importance of bringing a mobile phone to school. One of the most important reasons is that mobile phones will help parents keep in touch with their children if their children get sick or have any problems and they need to go home soon. In addition, it is very convenient for parents in managing their children, especially, in emergency situations. Another reason is that children can use mobile phones to find study documents. It means that smartphones can be used to help find many free materials, get more useful knowledge from the internet and so on.

All in all, from what has been discussed above, I absolutely agree with this idea. As far as, I am concerned, therefore, it is sensible that such controversial issues must be viewed from various aspects.

4. TO IMPROVE ENGLISH TEACHING QUALITY, WE ONLY NEED NATIVE TEACHERS. DO YOU AGREE OR DISAGREE?

In the modern life, it is thought by many people that **to improve English teaching quality, we only need native teachers**. I completely **disagree** with that idea because of the typical following reasons.

It is clear that there are many reasons why I strongly disagree this matter. One of the most important reasons is that we can prepare necessary learning equipment to improve teaching. In fact, we will feel comfortable and learn more effectively when we have modern equipment to support us during learning process. Besides, another typical reason is that we can study non-native teachers because they have good Vietnamese. In addition, when we study English with non-native teachers, we can absorb the lesson better, keep up with the lesson and communicate with them more easily.

However, there are various reasons that we cannot deny the importance of native teachers. One of the most important reasons is that they help us improve our English speaking and listening skills better because they are good at English. In addition, it is very good for our learning, for example we can practice pronunciation, improve

communication skills and it help us increase our confidence when communicating. Another reason is that we can learn many things from them. It means that we can know more about their interesting cultures and customs, it makes it easy for us to make friends with international students.

In the modern life, it is thought by many people that **art is a waste of time, children should focus on maths and languages instead of art**. I completely **disagree** with that idea because of the typical following reasons.

It is clear that there are many reasons why I strongly disagree this matter. One of the most important reasons is that the art will help children develop imagination and creation. In fact, learning the arts will help children discover other skills such as singing and dancing, and in the future, they can develop better those skills. Besides, another typical reason is that the art will help children relax. In addition, Art helps children refresh their mind, so they can learn better, develop intelligence, confidence, patience, increase creativity and so on.

However, there are various reasons that we cannot deny the importance of maths and languages. One of the most important reasons is that it helps children have many choices about jobs in the future. In addition, I realized that many majors in universities need both of these subjects, they can choose a major that they love and love easily, so I feel it is also very important. Another reason is that besides, thanks to both subjects, children become smarter. It means that these subjects help them understand things faster and be able to solve things better.

All in all, from what has been discussed above, I absolutely disagree with this idea. As far as, I am concerned, therefore, it is sensible that such controversial issues must be viewed from various aspects.

In fact, we can be steal valuable things such as money, smartphones, personal papers and so on. Besides, another typical reason is that **we cannot be proactive our time**. In addition, it is really inconvenient because we had to remember the exact timetable of the buses. If not, we will be delay the work and late.

However, there are various reasons that we cannot deny the advantages of private cars. One of the most important reasons is that **private cars are more convenient than the public transport**. In addition, we have our own space, when using private cars. Besides, we can do many things and we can change the destination anytime if we want. Another reason is that **we can be proactive our time**. It means that private cars are more flexible than buses so we do not have to wait long in the bus station.

Benefits of further education = further studies

In the modern life, it is thought by many people that **to improve life, further education is necessary for university students**. I completely **agree** with that idea because of the typical following reasons.

It is clear that there are many reasons why I strongly agree this matter. One of the most important reasons is the job opportunities. In fact, you will have a lot of in-depth knowledge when you get a degree from famous universities that will help you get a good job in the future, with a higher salary. Besides, it helps to improve lives and can help your families. Besides, another typical reason is that we can have a lot of relationship. Building these relationships is very important because it can help you expand your knowledge and have many opportunities to develop yourself in the future.

However, there are various reasons that we cannot deny several drawbacks of further studies. One of the most important reasons is that we can face with financial problems. In addition, every month, we have to pay a lot of expenses such as the telephone bills, electricity bills and other daily expenses. So we have to manage our money carefully or get a part-time job to be able to pay other expenses. Another reason is that we have a lot of particular skills when getting a job. It means that instead of further education, we can learn a lot from work experience. It is also very useful and besides, it also helps us earn money to pay for living expenses.

All in all, from what has been discussed above, I absolutely agree with this idea. As far as, I am concerned, therefore, it is sensible that such controversial issues must be viewed from various aspects.

**1. English should be taught as a compulsory (1 học bắt buộc) subject at primary school→
agree**

In the modern life, it is thought by many people that English should be taught as a compulsory subject at primary school. There are numerous reasons why I strongly agree with this opinion, and I would like to explain a few of the most important ones.

The most important reason why I agree with this is that English is the international language in the world. It means that it is very important and necessary for everyone in modern life. It can help children have knowledge and they can have a good job in the future if they study English well. Specifically, they can study abroad in developed countries such as America, Australia, Japan, and so on. It is very useful.

Another reason that can be seen by everyone is that it is very easy for children to learn a foreign language. That is because children are easy to gain knowledge. To show an example, children can learn speaking skills easily because they can imitate the native voice. Besides, they can remember faster and longer than adults. It is very important and necessary.

To sum up, from what has been discussed above, I can safely draw the conclusion that I absolutely agree that English should be taught as a compulsory subject at primary school. From my point of view, English is very important so we should learn English well in order to develop ourselves and have a good job in the future.

In the modern life, it is thought by many people that Computers are being used more and more in education and so there will soon be no **role** for the teacher in education. There are numerous reasons why I strongly **disagree** with this opinion, and I would like to explain a few of the most important ones.

The most important reason why I disagree with this is that the teachers play an important role in education. That is because only teachers have **teaching experiences** in order to help their students understand the lessons easily. To show an example, with weak students in studying, the teachers will use suitable teaching methods in order to help them study better. It is very important and necessary.

Another reason that can be seen by everyone is that the teachers have specific **personalities** that are very suitable for teaching. Take my English teacher as an example, she is very friendly, easy going, enthusiastic and helpful so I feel very comfortable when I study. I can ask many questions when I do not understand the lessons. In contrast, computers do not have these personalities to help students in learning. It is very good for the learning of students.

To sum up, from what has been discussed above, I can safely draw the conclusion that I absolutely disagree that Computers are being used more and more in education and so there will soon be no **role** for the teacher in education. 9. Choose a gift for parent's wedding anniversary: a bouquet/ bunch of flowers, a handmade card, cinema tickers.

Hello teacher have a nice day,

I am thinking about to choose a gift for parent's wedding anniversary. There are three options: a bunch of flower, a handmade card, cinema tickets. In my opinion handmade card is the best choice for me.

Making handmade cards is very cheap and easy to do, I can save a lot of money and time. I can use this money to buy other things for my parents. Although it is simple but very meaningful to express the love that I have for them. my parents can keep it as a souvenir. I am going to make a yellow card because that is my mom's favorite color. On the card I will decorate pretty birds and flowers. I hope they will like this gift.

There are some reasons why I don't choose the other option. About bunch of flowers, the cost to buy flowers is very expensive moreover we cannot keep for a long time so it is not my choice. I don't choose cinema tickets because it is not suitable for my parent, they don't like noisy places. Besides they prefer watch movie at home than go to the cinema.
